Dear Hiring Manager,

I am excited to apply for the Data Scientist position at Myntra. With over 2.5 years of experience in Generative AI, Machine Learning, NLP, and Python development, I have delivered multiple AI-driven solutions that enhance business outcomes and customer experiences.

At HCL Tech, I:
- Developed 10+ client-specific solutions using Python, OpenAI LLM models, AWS Bedrock (Claude Models), and Langchain.
- Built RESTful APIs and integrated cloud services like AWS S3 and Neo4j, enabling scalable knowledge graphs.
- Created intuitive user interfaces with Streamlit, Gradio, and Angular, improving client presentation effectiveness by 25%.
- Led Python and Flask training sessions for 15+ team members, boosting team productivity and capabilities.

My hands-on expertise in machine learning pipelines, cloud-based deployments, and scalable architectures positions me to contribute meaningfully to Myntra's initiatives. I am particularly inspired by Myntra's emphasis on deploying state-of-the-art models for large-scale customer impact and its commitment to research excellence.

I look forward to the opportunity to discuss how my skills and experience align with your team's goals. Thank you for considering my application.

Best Regards,
Awanish Kumar
